

Lean and trim in an hour!

When Hollywood celebrities, royalty and athletes want to achieve that perfectly-sculpted silhouette for a camera moment, they get lean and trim with an award-winning Body Lift Mineral Wrap at Suddenly Slender.

With your to-do lists crammed with so much multitasking, it is no surprise that looking good sits right at the bottom.

Getting together with business associates or simply chilling with loved ones often mean lots of wining and dining, which could invariably lead to weight gain, which you don't really notice until an important occasion – a wedding reception or a gala evening – comes around and you realise to your horror that one of your favourite dresses do not fit anymore!

Solution of 175 minerals and nutrients

That's why a session with Suddenly Slender's award-winning Body Lift Mineral Wrap is excellent for busy women. It begins with a full stand-up body wrap, during which your full body will be wrapped in porous bandages that have been soaked in a solution of 175 natural minerals and nutrients (including antioxidants, vitamins, calcium, magnesium and oxygen).

This is followed by light exercise on a glider or power shaper in a private room while being wrapped – and watching your favourite movie. You will be basted with the solution every 20 minutes. After an hour, bandages are removed and you are measured for inches lost.

The mineral solution not only detoxifies and

replenishes the body, but also flushes out toxins and impurities that cause premature ageing, wrinkles and cellulite.

Helps target overall body problems

This exchange process helps break down stubborn fat, tighten the body and shape up your figure. As a result, it can successfully help target overall body problems, reduce unsightly bulges and cellulite, and lifts and tightens skin for a shapelier appearance.

As it stimulates fat burning and increases the metabolism without causing you to sweat or heat up, you will not get dehydrated, thirsty or tired instead you will feel light and refreshed.

Amazing, instant results

What really gives Suddenly Slender's Body Lift Mineral Wrap, which has garnered a strong following because it is a safe and healthy way to slim down, the edge over other slimming treatments is the amazing and instant results.

According to Senior Manager, Business Development Merlin Lau, who trained with Suddenly Slender International, "From the first body wrap, clients can expect to lose between 6 to 20 inches within an hour. These results can be maintained without you having to change your lifestyle or stick to a special diet."
